

PEDRO HERRERA DIAZ

MATERIA: INTRODUCCION A LA CIENCIA DE DATOS

NOMBRE DEL PROFESOR

JAIME ALEJANDRO ROMERO SIERRA

20/10/2025

[https://github.com/user-  
attachments/files/23013583/ObesityDataSet\\_raw\\_and\\_data\\_synthtic.csv](https://github.com/user-attachments/files/23013583/ObesityDataSet_raw_and_data_synthtic.csv)

Esta base de datos contiene información sobre la obesidad

En esta base de datos encontramos diferentes columnas, como lo son genero, edad, altura, peso, antecedentes, familiares con sobre peso.

GENERO: masculino o femenino

Edad:

Altura:

Peso:

Antecedentes:

Familiares con sobre peso:

The screenshot shows a Google Colaboratory notebook interface. On the left, there's a sidebar with navigation links like 'Archivo', 'Editar', 'Ver', 'Insertar', 'Entorno de ejecución', 'Herramientas', and 'Ayuda'. The main area has a search bar at the top with 'Comandos', 'Código', 'Texto', and 'Ejecutar todo' buttons. To the right are 'Compartir' and 'Conectar' buttons. The central workspace shows a code cell with the following Python script:

```
lista_col=df.columns
for nombre in lista_col:
    print(f"En la columna {nombre} los invalid_value son: {df[df[nombre] == 'invalid_value'].shape[0]}")
```

The output of this code is a series of 18 lines, each stating that the count of invalid values for a specific column is 0. The columns listed are: Gender, Age, Height, Weight, Family\_history\_with\_overweight, FAVC, FCVC, NCP, CAEC, SMOKE, CH2O, SCC, FAF, TUE, CALC, MTRANS, and NObeyesdad.

```

## Conclusión

La base de datos no estuvo complicada, ya que en la mayoría esta en una forma donde yo puedo trabajar sin ningún problema.
